CONTENTS

No. 1, January, 1948

Bacteriological Study of Carboxylmethoxylamine Hemihydrochloride. Cutting B. Favour 1
The Inhibitory Effect of Lipase on Bacterial Growth in Media Containing Fatty Acid Esters. Bernard D. Davis and René J. Dubos 11
The Effects of Salts on Streptomycin and Dihydrostreptomycin in Agar Plate Assays. S. F. Quan 25
The Effect of Aromatic Diamidines on Bacterial Growth. I. The Mechanism of Action. Leah Bichowsky-Slomnitzki 27
The Effect of Aromatic Diamidines on Bacterial Growth. II. The Antagonism of Nucleic Acids and Polyamines. Leah Bichowsky-Slomnitzki 33
A Note on Detergent Interference in the Serial Dilution Assay of Penicillin Using *Bacillus subtilis*. Richard J. Hickey 43
The Use of the Electron Microscope in Diagnosis of Variola, Vaccinia, and Varicella. F. P. O. Nagler and Geoffrey Rake 45
Further Studies on the Alcohol Tolerance of Yeast: Its Relationship to Cell Storage Products. William D. Gray 53
Physiological Studies on Spore Germination with Special Reference to *Clostridium botulinum*. I. Development of a Quantitative Method. E. Staten Wynne and Jackson W. Foster 61
Physiological Studies on Spore Germination with Special Reference to *Clostridium botulinum*. II. Quantitative Aspects of the Germination Process. E. Staten Wynne and Jackson W. Foster 69
The Enhancement of Penicillin Effectiveness *in Vivo* by Traces of Cobalt. Robertson Pratt, Jean Dufrenoy, and Louis A. Strait 75
The Granulose Reaction of Certain Anaerobes of the "Butyric" Group. Robb Spalding Spray 79
The Effects of *Vibrio fetus* on the Growth of *Trichomonas foetus* (Protozoa). Charles M. Ford and Banner Bill Morgan 85
The Influence of Varied Protein Intake and of Tryptophane Deficiency on Theiler's Encephalomyelitis of Mice. E. B. Kearney, W. L. Pond, B. A. Plass, K. H. Maddy, C. A. Elvehjem, and P. F. Clark 89
The Apparent Involvement of *Vibrio fetus* in an Infection of Man. B. Q. Ward 113
Studies on Certain Biological Characteristics of *Malleomyces mallei* and *Malleomyces pseudomallei*. I. Morphology, Cultivation, Viability, and Isolation from Contaminated Specimens. Winston R. Miller, Lolita Pannell, Leo Cravitz, William A. Tanner, and Mabel S. Ingalls 115
Studies on Certain Biological Characteristics of *Malleomyces mallei* and *Malleomyces pseudomallei*. II. Virulence and Infectivity for Animals. Winston R. Miller, Lolita Pannell, Leo Cravitz, William A. Tanner, and Theodore Rosebury 127
Note:
Changes Induced in the 1, 2, 3 Antigens of *Salmonella*. D. W. Bruner and P. R. Edwards 137

No. 2, February, 1948

Induced Resistance of *Staphylococcus aureus* to Various Antibiotics. John W. Klimek, Chester J. Cavallito, and John Hays Bailey 139
The Relation between Induced Resistance to Penicillin and Oxygen Utilization. W. Dexter Bellamy and John W. Klimek 147
Some Properties of Penicillin-resistant Staphylococci. W. Dexter Bellamy and John W. Klimek 153

Amino Acid Metabolism of Penicillin-resistant Staphylococci. E. F. Gale and A. W. Rodwell 161
The Nutrition of Protozoa. III. An Improved Procedure for Separating Human Blood Serum into the Two Fractions Essential for the Sustained Growth of *Trichomonas vaginalis*. Herbert Sprince 169
The Reversal of Antibiotic Action. John Hays Bailey and Chester J. Cavallito 175
Some Alterations in Chicken Erythrocytes Which Follow Treatment with Influenza and Newcastle Disease Virus. Alfred L. Florman 183
The Conversion of Sucrose to a Polysaccharide of the Starch-Glycogen Class by *Neisseria* from the Pharynx. Edward J. Hehre and Doris M. Hamilton 197
The Production of 2,3-Butylene Glycol by *Aerobacter aerogenes* 199. B. H. Olson and M. J. Johnson 209
The Nutrition of *Clostridium kluyveri*. B. T. Bornstein and H. A. Barker 223
The Identification of Streptomycin on Paper Strip Chromatograms. Raymond E. Horne, Jr., and Arthur L. Pollard 231
Screening Methods for Determining Antibiotic Activity of Higher Plants. H. J. Carlson and Harriet G. Douglas 235
Antibacterial Substances Separated from Plants. H. J. Carlson, H. G. Douglas, and J. Robertson 241
Bacitracin: Methods of Production, Concentration, and Partial Purification with a Summary of the Chemical Properties of Crude Bacitracin. Herbert S. Anker, Balbina A. Johnson, Joseph Goldberg, and Frank L. Meleney 249
Lysis and Lysis Inhibition with *Escherichia coli* Bacteriophage. A. H. Doermann 257
The Effect of Several Compounds on the Inhibition of Bacterial Growth by Sulfaguanidine, Sulfamerazine, and Sulfasuxidine. William E. Clapper and Ikuya T. Kurita 277
Notes:
A New *Salmonella* Type: *Salmonella memphis*. Alice B. Moran, P. R. Edwards, and D. W. Bruner 285
Modification of an Agar Diffusion Method of Assay for Polymyxin. R. G. Benedict and F. H. Stodola 286

No. 3, March, 1948

International Bacteriological Code of Nomenclature. Edited by R. E. Buchanan, Ralph St. John-Brooks, and Robert S. Breed 287
Demonstration of Phosphatases and Lipase in Bacteria and True Fungi by Staining Methods and the Effect of Penicillin on Phosphatase Activity. Milward Bayliss, David Glick, and Robert A. Siem 307
The Production of Streptomycin by *Streptomyces bikiniensis*. Donald B. Johnstone and Selman A. Waksman 317
Chemical Activation of Ascospore Germination in *Neurospora crassa*. Mary R. Emerson 327
Physiological Studies on Spore Germination, with Special Reference to *Clostridium botulinum*. III. Carbon Dioxide and Germination, with a Note on Carbon Dioxide and Aerobic Spores. E. Staten Wynne and Jackson W. Foster 331
The Relative Antisyphilitic Activity of Penicillins F, G, K, and X and of Bacitracin, Based on the Amounts Required to Abort Early Syphilitic Infections in Rabbits. Harry Eagle and Ralph Fleischman 341
The Action of Bacitracin and Subtilin on *Treponema pallidum in Vitro* and *in Vivo*. Harry Eagle, Arlyne D. Musselman, and Ralph Fleischman 347
Studies on a New Oxalate-decomposing Bacterium, *Vibrio oxaliticus*. J. V. Bhat and H. A. Barker 359
Resistivity of *Escherichia coli* to Ultraviolet Energy (λ2537) as Affected by Irradiation of Preceding Cultures. Matthew Luckiesh and Thomas Knowles 369

On the Antigenic Structure of the Bacterial Spore. Beatrice W. Doak and Carl Lamanna 373
Studies on the Effect of Immune Reactions on the Metabolism of Bacteria. I. Methods and Results with *Eberthella typhosa*. M. G. Sevag and Ruth E. Miller 381
Serological and Biological Characteristics and Penicillin Resistance of Nonhemolytic Streptococci Isolated from Subacute Bacterial Endocarditis. S. Stanley Schneierson 393
The *l*-Amino Acid Oxidase of Molds. S. G. Knight 401
Some Properties of an Antibiotic Obtained from a Species of *Streptomyces*. David Gottlieb, P. K. Bhattacharyya, H. W. Anderson, and H. E. Carter 409
The Isolation of *Salmonella typhi-murium* from Ferrets. J. Anthony Morris and Don R. Coburn 419
Factors Affecting the Production of Tetanus Toxin: Temperature. J. Howard Mueller and Pauline A. Miller 421
Chloromycetin: Biological Studies. Robert M. Smith, Dwight A. Joslyn, Oswald M. Gruhzit, I. William McLean, Jr., Mildred A. Penner, and John Ehrlich 425
Note:
Changes Induced in the O Antigens of *Salmonella*. D. W. Bruner and P. R. Edwards. 449

No. 4, APRIL, 1948

The Inhibition of Sulfhydryl Enzymes as the Basis of the Bactericidal Action of Chlorine. W. E. Knox, P. K. Stumpf, D. E. Green, and V. H. Auerbach 451
A Variant of *Mycobacterium ranae* Requiring Streptomycin for Growth. Diran Yegian and Vera Budd 459
Studies on Subtilin Fastness *in Vitro*. A. J. Salle and Gregory J. Jann 463
A New Technique for Isolating Listerellae from the Bovine Brain. M. L. Gray, H. J. Stafseth, Frank Thorp, Jr., L. B. Sholl, and W. F. Riley, Jr. 471
The Oxidation of Aromatic Compounds by Fluorescent Pseudomonads. R. Y. Stanier. 477
Physiological Studies on Spore Germination, with Special Reference to *Clostridium botulinum*. IV. Inhibition of Germination by Unsaturated C_{18} Fatty Acids. Jackson W. Foster and E. Staten Wynne 495
The Relationship of the Age of the Bacterial Culture to the Delay in Sulfonamide Bacteriostasis. Anne Stewart Youmans 503
The Utilization of Nitrogen in Hydroxylamine and Oximes by *Azotobacter vinelandii*. Ruth Novak and P. W. Wilson 517
Cytochemical Mechanisms of Penicillin Action. V. Comparative Effects of Ribonuclease, Cobra Venom, and Penicillin on Susceptible Bacteria. Jean Dufrenoy and Robertson Pratt 525
A Simple Medium for Identification and Maintenance of the Gonococcus and Other Bacteria. Harriette D. Vera 531
Further Studies on the Morphology of *Escherichia coli* Exposed to Penicillin. A. J. Shanahan and F. W. Tanner 537
A Microbiological Method for the Assay of Subtilin. Riley D. Housewright, Richard J. Henry, and Sam Berkman 545
Pigment Production by *Neurospora crassa* in the Presence of *para*-Aminobenzoic Acid. John E. Cushing and Evans B. Reid 551
The Effect of Penicillin on the Growth of *Mycobacterium tuberculosis* in Dubos' Medium. Morris Solotorovsky, Elizabeth J. Bugie, and Bettina M. Frost 555
A New *Salmonella* Type: *Salmonella waycross*. Erich Seligmann and Ivan Saphra 561
Physical Action of Surface-active Cations upon Bacteria. E. W. Kivela, W. L. Mallmann, and E. S. Churchill 565
Studies on Polymyxin: The Production of Fermentation Liquor. P. G. Stansly, M. E. Schlosser, N. H. Ananenko, and M. H. Cook 573
Note:
Chromogenic Bacteria Related to *Bacterium globiforme*. A. G. Lochhead 579

No. 5, MAY, 1948

Factors Influencing the Production of Lipase by *Mycotorula lipolytica*. I. I. Peters and F. E. Nelson 581
Preliminary Characterization of the Lipase of *Mycotorula lipolytica*. I. I. Peters and F. E. Nelson 593
Nutrition of *Streptococcus bovis*. C. F. Niven, Jr., Mary R. Washburn, and J. C. White 601
Antibiotic Substances Separated from Sumac. H. J. Carlson, H. G. Douglas, and H. D. Bissell 607
Antibiotic Agents Separated from the Root of Lace-leaved Leptotaenia. H. J. Carlson and H. G. Douglas 615
The Problem of "Dormancy" in Bacterial Spores. Jackson W. Foster and E. Staten Wynne 623
Interference between Human Pneumonitis Virus and Psittacosis Virus. Orville J. Golub and John C. Wagner 627
The Activation of the Bacterial Virus T4 by L-Tryptophan. Thomas F. Anderson 637
The Inheritance of Requirements for Adsorption Cofactors in the Bacterial Virus T5. Thomas F. Anderson 651
The Influence of Temperature and Nutrients on Plaque Formation by Bacteriophages Active on *Escherichia coli* Strain B. Thomas F. Anderson 659
Cultural Characteristics of *Donovania granulomatis*. Geoffrey Rake and John J. Oskay 667
The Effect of Sodium Fluoride on the Metabolism of Certain Mycobacteria. Robert J. Fitzgerald and Frederick Bernheim 677
The Nutritional Requirements of *Lactobacillus pentosus* 124-2. Keatha K. Krueger and W. H. Peterson 683
Metabolism of Biotin and Oxybiotin by *Lactobacillus pentosus* 124-2. Keatha K. Krueger and W. H. Peterson 693
The Effect of Radioactive Phosphorus upon a Suspension of *Escherichia coli*. Clarence F. Schmidt 705
Antigenic Studies of a Group of Paracolon Bacteria (Bethesda Group). P. R. Edwards, Mary G. West, and D. W. Bruner 711
The Identification of Antibiotics by Means of Resistant Strains of Bacteria. P. G. Stansly 721
Cytochemical Mechanisms of Penicillin Action. VI. The Influence of Cobalt on the Optimal Bacteriostatic Concentration of Penicillin. Robertson Pratt and Jean Dufrenoy 727
Grísein, an Antibiotic Produced by Certain Strains of *Streptomyces griseus*. Donald M. Reynolds and Selman A. Waksman 739
Preliminary Observations on Germination of the Spores of *Bacillus mycoides* in a Nitrogen-free Medium and Certain Properties of the Transparent Cells. Georges Knaysi 753
Shigella tietê. A. J. Weil and H. Slafkovsky 759
Notes:
Nutritional Requirements of *Bacillus larvae*. H. Katznelson and A. G. Lochhead 763
Mima polymorpha in Meningitis. George G. De Bord 764
The effect of Streptomycin on the Formation of Adaptive Enzymes. Robert J. Fitzgerald and Frederick Bernheim 765
Steroid Effect upon Bacterial Growth. Esther W. Squire and Edward N. Squire 766

No. 6, JUNE, 1948

Amino Acid Interrelationships in the Nutrition of *Streptococcus bovis*. Mary R. Washburn and C. F. Niven, Jr. 769
The Action of *Bacillus cereus* and Related Species on the Lecithin Complex of Egg Yolk. Arthur R. Colmer 777

Variation in Pigment Production in *Staphylococcus aureus*. Pamela H. Byatt, Gregory J. Jann, and A. J. Salle 787
Studies of Staphylococci with Special Reference to the Coagulase-positive Types. James B. Evans 793
Staphylococcal Penicillinase: Characteristics of the Enzyme and Its Distribution. Betty St. C. Gilson and Robert F. Parker 801
Factors Affecting the Production of Amylase by *Aspergillus niger*, Strain NRRL337, When Grown in Submerged Culture. N. M. Erb, R. T. Wisthoff, and W. L. Jacobs 813
Studies with the Electron Microscope on the Interaction of Red Cells and Influenza Virus. F. Heinmets 823
The Effect of Sulfathiazole on the Rate of Increase of Riboflavin Production by *Proteus vulgaris* and *Bacillus subtilis*. Raymond E. Crandall 833
Three New Species of the Genus *Clostridium*. Robb Spalding Spray 839
The Susceptibility of Penicillinase-producing Bacteria to Penicillin. I. Factors Influencing Susceptibility. Amedeo Bondi, Jr., and Catherine C. Dietz 843
The Susceptibility of Penicillinase-producing Bacteria to Penicillin. II. The Effect of Sodium Azide. Catherine C. Dietz and Amedeo Bondi, Jr. 849
The Effects of an Extract of Blood Cells upon the Cultivation of *Bacterium tularense* in Liquid Media. I. W. Gibby, P. S. Nicholes, J. T. Tamura, and Lee Foshay 855
A Further Note on the Antigenic Relationships of *Donovania granulomatis* (Anderson). Geoffrey Rake 865
Notes:
A Dehydrated Experimental Medium for the Microbiological Assay of Folic Acid. Beryl F. Capps, Norman L. Hobbs, and Sereck H. Fox 869
Salmonella chandans: a New Type Isolated from a Lizard. W. R. Hinshaw and Ethel McNeil 870
Media Prepared by the Pancreatic Digestion of Meat. J. Howard Brown 871
Index of Authors 873
Index of Subjects 875
